

Bamboo Quadro

Bamboo Quadro

design **Marco Piva**

Bamboo q è la serie a sezione quadra progettata da Stella.

Non un semplice rubinetto ma un eccellente esempio di “good design”; sintesi di tutte le caratteristiche tipiche del prodotto Stella: ricercatezza formale, completezza della serie, accuratezza nelle finiture e soluzioni meccaniche fondate su una sapienza produttiva dalle radici antiche ma che propone in una serie Contemporanea adatta all’oggi e al domani. Modernità e funzionalità sembrano dunque fondersi in un unico oggetto: contemporaneo ma già proiettato al futuro, come solo i must di design sanno fare, come solo i prodotti Stella sanno fare.

Bamboo Quadro is the square section series designed by Stella.

Not just a tap but an excellent example of “good design”, synthesis of all the typical features of Stella: formal elegance, depth of range, finishing accuracy and mechanical solutions based on a production knowledge with ancient roots but which proposes a Contemporary Series suitable for today and tomorrow.

Modernity and function therefore seem to merge into a single object: contemporary yet with a view to the future, the “must” of exceptional design which only Stella products can achieve.
